

This guide walks you through the Rx Aftercare Coach Dashboard — where you can view your assigned students' progress, track engagement, and reach out to those who may need support.

1. Logging In

Coach Dashboard URL

<https://dryanchicago.github.io/rx-aftercare-frontend/coach.html>

1	Open Browser	Go to: https://dryanchicago.github.io/rx-aftercare-frontend/coach.html
2	Enter Credentials	Enter the email address and password provided by your administrator.
3	Sign In	Click Sign In. You are taken directly to your Coach Dashboard.

💡 Bookmark the coach login URL for quick access. Contact your program administrator if you need your credentials reset.

📌 If you see a 'backend sleeping' message, the server may be in sleep mode. Wait a moment and refresh the page. If the issue persists, contact your administrator.

First Login — Setting Your Password

When you log in for the first time using the temporary credentials from your invitation email, you will be immediately prompted to create a permanent password before you can access the dashboard. This step is required and cannot be skipped.

Steps

- Open the coach login page using the link in your invitation email.
- Enter your email address and the temporary password provided in the invitation.
- A password change screen will appear automatically. Enter your new password twice to confirm and click **Set Password**.
- You will be taken directly to your coach dashboard. Use these credentials for all future logins.

If you lose access to your account, contact rxsupport@graymattersgroup.com for a password reset.

2. Overview Panel

The Overview Panel at the top of the Coach Dashboard gives you a quick snapshot of your entire student roster at a glance.

Metric	What It Shows
Students Assigned	The total number of students in your roster — everyone your administrator has assigned to you.
Avg Goal Progress	The average percentage of committed activities marked Complete across all your assigned students.
Below 25% Progress	A count of students whose overall progress is below 25% — these are students who may benefit from outreach or a check-in.

3. My Students List

Below the Overview Panel you will find the My Students list — your full roster of assigned students. Each student appears as a card with key information at a glance.

Sorting Your Student List

Use the Sort dropdown at the top of the student list to organize students the way most useful for your workflow:

Sort Option	What It Does
Least Progress First	Shows students with the lowest overall progress percentage at the top. Useful for identifying who needs the most support.
Most Progress First	Shows your highest-performing students first. Useful for seeing who is on track.
Recently Active	Shows students who have most recently visited their dashboard at the top.
Name A–Z	Alphabetical sort by student last name.

Student Card

Each student card in the list shows:

Field	Description
Name	Student's full name.
Email	Student's email address.
Class Name	The cohort class the student is enrolled in.
Overall Progress Bar	A visual progress bar showing the percentage of committed activities marked Complete.
Progress %	The exact percentage displayed alongside the bar.
Last Active	The date the student last visited their dashboard.
Activity Count	Total number of activities the student has committed to.
View Details button	Opens the full Student Detail View for that student.

View Details

4. Student Detail View

Click View Details on any student card to open their full progress breakdown.

Student Header

Field	What It Shows
Student name	Full name of the student.
Email	Student's email address — click to compose an email.
Class · Enrolled Date	The cohort class name and the date the student was enrolled.

Overall Goal Progress

A full-width progress bar showing the student's overall completion percentage — the proportion of all committed activities that are marked Complete.

Email Engagement Panel

Shows how the student has been engaging with the program emails:

Metric	Description
Emails Sent	Total number of scheduled program emails that have been sent to this student.
Open Rate	Percentage of sent emails that the student has opened.
Clicks	Total number of link clicks across all emails.
Send a Nudge button	Sends a one-off encouraging email to the student from you. Use this to check in personally on students who appear to have disengaged.

 Use Send a Nudge for students who have a low open rate or haven't been active recently. It sends a personalized touch-point email that encourages them to revisit their dashboard.

Goal Summary Panel

Metric	Description
Total Committed Activities	The total number of activities the student committed to across all selected goals.
Complete Count	How many of those activities are marked Complete.
Remaining Count	How many activities are Not Started or In Progress.

Goal Progress Section

Below the summary, each goal the student selected is shown with:

- Goal name
- A progress bar for that goal showing % of activities complete
- A percentage complete figure

Expand any goal to see its individual activities and their current status:

Status Badge	Color	Meaning
NOT STARTED	Gray	Student has not yet begun this activity.
IN PROGRESS	Yellow / Gold	Student has started this activity. Updated date is shown.
COMPLETE	Green	Activity is done. Completed date is recorded.

***i** Status badges are updated by the student on their own dashboard — you cannot change a student's activity status from the Coach Dashboard. Your role is to view and encourage.*

5. How the System Keeps Students Engaged

This section describes what happens automatically in the background — no action is required from you as a coach.

Weekly Booster Emails

Throughout the 90-day program, students receive scheduled “booster shot” emails from Gray Matters Group. Each email contains an **Update My Progress** → button that signs them in automatically with one click and takes them directly to their goal dashboard. Students can also log in and update their activity statuses at any time — they do not need to wait for an email to arrive.

Automated Progress Reminders

The system sends two automated reminder emails to students who have not updated their progress dashboard. Each reminder is sent **once per student**— not repeatedly. Students who are proactively keeping their dashboard current will not receive these.

- **Halfway Check-in:** A single email reminding students they are at the midpoint of the program and encouraging them to reflect on and record their progress.
- **Final Reminder:** A single email as the program nears its end, reminding students this is their last opportunity to capture the work they have done throughout the program.

New Student Goal Reminders

If a student has not committed to any goals within the first 3 days of the program, they receive a gentle weekly reminder to set their goals. This continues until goals are set.

What This Means for You as a Coach

You do not need to manage any of this — it is fully automated. Your role is to use the **Send a Nudge** button in your dashboard for personal outreach to students who appear disengaged, and to respond to messages students send you via **Ask My Coach**.

6. Tips for Effective Coaching

Suggested Weekly Workflow

1	Review Overview Panel	Check Avg Goal Progress and the Below 25% Progress count at the start of each week.
2	Sort by Least Progress	Use the Least Progress First sort to surface students who may need outreach.
3	Review Last Active	Check the Last Active date on low-progress students — a student who hasn't logged in recently may need a nudge.
4	Send Nudges	Use the Send a Nudge button in the Student Detail View to reach out to disengaged students.
5	Celebrate Progress	Use the Most Progress First sort to identify high performers — a brief encouraging note can reinforce momentum.

Interpreting Progress Data

Progress in the dashboard reflects activity status updates made by the student. Keep these points in mind:

- Progress % only counts activities marked Complete — In Progress activities do not count toward the progress bar.
- A student with 0% progress may simply not have updated their statuses yet — check Last Active date before drawing conclusions.
- Activity count varies per student — students who selected more activities will naturally take longer to reach higher completion %.

Ask My Coach

Students can send you a message at any time directly from their Rx Aftercare dashboard by clicking the **Ask My Coach** button. You will receive an email notification that includes the student's message and a **View in Dashboard** button. Clicking that button logs you in automatically—no username or password required—and takes you directly to your coach dashboard.

The magic link in the email is valid for 7 days and can be used more than once during that period. If you prefer to reply to the student directly, simply use the Reply button in your email client—your reply will go directly to the student's email address, not back to the system.

To respond via the dashboard:

- Click **View in Dashboard** in the notification email. You will be logged in automatically.
- Find the student on your roster and click their name to open their detail view.
- Review their goal progress, activity status, and email engagement before crafting your reply.

If a student sends a message before a coach has been assigned to them, the message is saved and you will be notified once the assignment is made.
